<b>Change Category</b>	
<b>Category</b>	<b>Type of Change</b>
Packing/Shipping	Dry pack requirements change
Process - Wafer Production	Move of all or part of wafer fab to a different location/site/subcontractor, New wafer diameter
Test Flow	Move of all or part of electrical wafer test and/or final test to a different location/site/subcontractor
Process - Assembly	Move of all or part of assembly to a different location/site/subcontractor., Change in process technology (e.g., die attach, bonding, moulding, plating, trim and form, lead frame preparation, ...), Change of specified assembly process sequence (deletion and/or additional process step)
<b>Description and Purpose:</b>	
<p>This Product Change Notification, is the continuation from FPCN22966ZJ, which is intended to increase capacity for onsemi automotive 30V and 40V Trench 6 MOSFET technology products by transferring wafer fabrication for these products to the Global Foundries Fab located in New York, US.</p> <p>The changes include transferring wafer fabrication, back grind and back metal, to Global Foundries, and utilizing 300mm instead of 200mm diameter wafers. And while the assembly location remains unchanged (at onsemi, Seremban, Malaysia), wafer saw and die attach tooling are being updated to accommodate 300mm wafers. In addition, the Wettable Flank leadframe design and plating process are being enhanced, as tabulated below, in order to improve the sidewall plating and the elimination of Dry Pack.</p>	

There is no change to the orderable part number.

There is no product marking change as a result of this change.
